Serious Debates begin the Month tending to the composing of differences, and the making up of former Breaches. Blessed are the Peace Makers! But 'tis to be feared this may not yet be effected; the hatefull opposition of *Saturn* and *Mars* threaten mischief in the general, and from the various Consigurations of this Month much variety of matter may be produc'd, and now the minds of People begin afresh to swell with ambiguous thoughts.

We find by experience that such Persons that have heads apt for councel may upon discontent find hearts as apt for Rebellion.

Grave & serious consultations amongst Persons of great Judgement are the principal concerns of this Month.

Now some deserving Person is honour'd with preferment.

Let the Guilty tremble, and let all innocent Loyal hearts who wish peace and prosperity may be preserv'd and continued in our *Brittish Kingdoms* rejoice in their freedom.

Now the People in general are in daily expectation to hear of some great Action suddenly to be performed.

We are not yet free from secret repining which may end in division. I hope no more Rebellion, God direct the great Councils of our Superiors & bless their consultations with happy success.

Many controversies and contentions do now suddenly break forth, and some sort of martial men accused and discarded with dishonour.

And I fear tumults or rash disorder and confusion appears or breaks forth if not carefully prevented, &c.

England is moſt juſtly accounted the moſt Fortunate Iſland of the whole World, & I pray God it may continue ſo, in it's intereſt of all ſorts, and alſo unity. But in theſe days 'tis too frequent for men to indeavor to enſnare and Trapan one another, and about this time we may expect to hear of many Falſities and (I may ſay) almoſt prodigious actions between Man & Man. Sudden News arrives to *England* diſcovering matters of conſequence drawing near. Let us ſtill hope he beſt and pray for the protection of our *Engliſh* Sovereign from all His enemies.

Into the future times why do we pry,
And ſeek to anticipate our miſery?
This Month we have another Conjunction of the Infortunes in the Sign of Juſtice, beſides no leſs than three more between the Infortunes & the Inferiour Planets which is very well worth our conſideration and obſervation. Now about this time may be expected a general Synod or Convention of Prudent and Grave Perſons to debate matters of great importance, and ſudden News arrives not pleaſing from the Weſtern parts of the World.

This Month affords a visible Eclipse of the Moon in the Twins, and if Records and contention breaks out this Month amongst us (especially amongst those persons pretending to Religion) 'tis onely ambition and self interest will be the original cause thereof, but let such remember that Honesty is the best Policy.

Heavens bless the *English* Nation from all Disasters, & from the Malice of their Forreign & Domestick Enemies, — and thus we may see that Fortune's wheel is continually Turning, *&c.*

Of

Of the Eclipses this Year 1686.

THere will be three Eclipses of the Luminaries this Year, *viz.* one of the Sun, and two of the Moon.

The first is of the Moon *May* the 27, near 11 in the forenoon, in about 16 degrees of *Sagittary*, not visible to us in *England*, but to our *Antipodes* digits eclipsed near 11.

The second Eclipse will be of the Sun, *November* the 5 near 10 at night, this and the former will be great Eclipses, but both invisible to us; this falls in the Sign *Scorpio*, and the digits eclipsed will be about 11, and may be seen in the south west parts of the World.

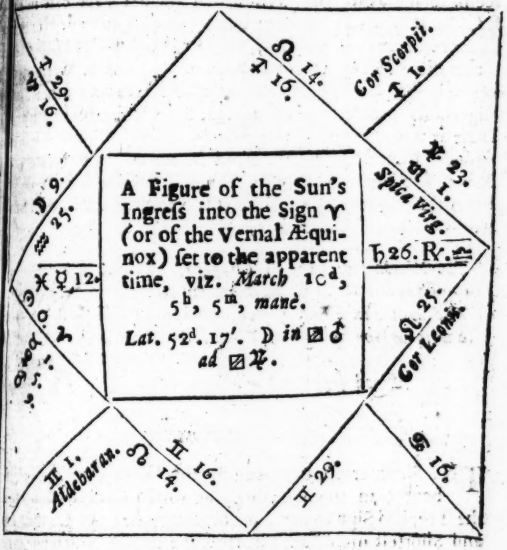
The third and last Eclipse is of the Moon, the 19 of *November*, the greatest obscurtion about a quarter past 11 at night, at which time if the Air be clear you may observe at least 6 Digits Eclipsed of ♋, in the Sign *Gemini* about 8 degrees thereof, and near a Fixed Star of the first magnitude called the *Bulls Eye*. The beginning near half an hour past 9 at night, and the end 3 quarters past midnight.

Advertisment.

THe true Spirit of Scurvey Grass both Plain and Golden, at Six pence a Glass in the City, and 8 pence in the Country, is made and sold by Dr *Pordage*, at his House in *Leather Lane* over against the *Chequer*-Inn Back-gate, with Directions for its Use as also its excellent Virtues at large in Print, and where to be had.

The

The Spring Quarter this year begins according to the most correct observation of our best Astronomers *March* the 20th, at 5^h $5'$ in the morning; a Scheme whereof follows for the Spring Quarter, 1686.



Brief Observations upon the aforegoing Scheme.

This position promises so little of Good that the less is said thereof, the better: The Ascendent being a Fixed Sign this Scheme may therefore serve for the Judgement of the whole Year, and finding the Moon (the significatrix of the Common People) afflicted by the ☍ of ♂ shews the great discontent of the Common People in particular, also of the Subjects in general, and this from the supposed prejudice they are

likely to sustain from the motion of Armies, to promote War, *&c.* and many discontented Spirits concern'd therein; hence arises their fear, which in all probability may be happily prevented; perhaps beyond expectation. The ☌ of ☉ and ♄, as also of the approaching ☌ of ♂ and ♄ from angles, seems to aggravate the evil, which did not *Jove* cast in his friendly Ray would be very considerable. Thus our Honey is likely to be mixed with Gall, and strange kind of Disputes & Animosities fomented by a Discontented uneasie Generation of men that are born to disturb themselves and others, and vigorously prosecute their violent headstrong Inclinations to their own Ruine and Destruction.---- Much more might be deduced from the Scheme, but being confin'd I refer the Reader to such Authors that annually write more copiously upon such Matters; and for this Quarter conclude in the words of the famous *Cowley*,

The World's a Scene of Changes and to be
Constant in Nature, were inconstancie:
The most Fix'd Being still, doth move and fly,
Swift as the wings of Time 'tis measur'd by.

Quod supra me nihil ad me.

Of the Summer.

THe Summer Quarter begins this Year *June* the 11th, about 5 in the morning, at which time the Sun enters the Tropical Sign *Cancer*, & thereby makes the Longest days and Shortest nights unto us that live on the North side of the *Æquinoctial*. This Quarter is naturally hot and dry, and therefore those of a Chollerick constitution should be most subject to Diseases, and those which are Flegmatick more healthfull; and therefore to preserve Health, eat such meats as are easily digested, and rather rise with an appetite than over-charge the Stomach; which now requires such cold meats which may moisten it and thereby mitigate the nature of the season. *Pulvis & umbra sumus.*

Of Autumn.

THe *Autumnal Æquinox* or Harveſt Quarter begins when the Sun toucheth the firſt point of *Libra*, which this Year falls upon the 13th. day of *September*, about 8 at night, and then the Days and Nights are equal all over the World, (except under the Poles) This ſeaſon is naturally cold and dry, and therefore thoſe of a Sanguine Complexion ſhould enjoy their health well, and the Melancholly Conſtitution moſt ſubject to diſeaſes. Now you may eat what meat or fruit your Appetite deſires, and 'tis alſo good to Purge and Bleed, and in your Broaths uſe Cordial powders, which will preſerve the Body till the enſuing Spring.

Of Winter.

THe Winter Quarter or *Solſtice* begins always when the Sun having finiſhed his greateſt Southern Declination, makes his approach to us again; and at the ſame time makes the greateſt quantity of Shadow, and leaſt portion of Sun-ſhine unto us, (as the contrary in all reſpects when he touches the Oppoſite or Northern Tropick) ſo that now the Sun touches the firſt ſcruple of *Capricorn* the days are ſhorteſt and the nights the longeſt with us. This Quarter commences the 11 day of *December*, at 8 in the morning. The natural temperature of this Quarter is cold and moiſt, and therefore aged Phlegmatick Conſtitutions are moſt ſubject to diſtempers, and Youth and Chollerick perſons enjoy their health beſt. In *December* Melancholly and Phlegm much abound and encreaſe in Humane bodies, therefore let all perſons be carefull to keep their heads and bodies as ſecure from cold as may be, and eat ſuch Broaths or Meats as are of a hot quality; and this is the way to preſerve health, and conſequently enjoy long life which moſt perſons deſire. And thus I conclude the four Quarters of the Year, in the words of the Poet,

Time wasteth Years, and Months, and Days and Hours;
Time kills the greenest Herbs and sweetest Flowers,
Time wears out Youth and Beauties Pride at length,
Time doth consume, Fame, Riches, Wit and strength.

The Sun you see so often Rise,
You see as often leave the Skies:
But we when our short night is past,
Shall live in Light whilst Heaven last.

An Account of the Planets Rising, Southing, and Setting this Year, of good use not onely to know them, but to find the Hour of the night.

January. ♄ about the midst of this month will be south between 3 and 4 in the morning, and rises at the beginning hereof between 10 and 11 at night. ♃ rises after midnight, and becomes south about 7 in the morning. ♂ towards the end sets in the west between 9 & 10 at night. ♀ may be seen in the evening to the westward, and about the end hereof she may be seen in the day time. But ☿ cannot be seen being Oriental and a morning Star.

February. About the beginning hereof ♄, ♃, and ☿ may be seen in the morning. ♄ rises about 8 at night, ♃ south about 5 in the morning the 10 day. ♂ sets about the middle of the month near 10 at night, and ♀ towards the end sets much about the same time, But ☿ rises near 6 in the morning about the middle of the month.

March. At the beginning hereof ♄ is occidental and therefore sets after the Sun, and becomes an evening Star, he rises about 6 in the evening in the East. ♃ rises about 11 at night, and ♂ about the middle of the month sets near 10 at night. ♀ about the 20 day sets a little after 9 at night in the West, ☿ rises about 5 in the morning the 12 day, but about the 24 day is hid by the Sun-beams, and at the end of the month ♃ may be seen with ☽ at midnight.

April.

April. ♄ at the beginning hereof ſouths about 10 at night, and ſets in the morning, ♃ riſes a little after 9 at night, but at the end hereof he becomes occidental and riſes about 8 at night, ♂ ſets near 9 at night the middle of the month, ☿, at the beginning of the month, becomes oriental and a morning Star and may therefore be ſeen about the midſt in the morning. At the end of the month ♀ may be ſeen in the Northweſt at night, and ſets near 10 at night.

May. At the beginning hereof ♄ is ſouth about 8 at night, and ſets near 3 in the morning, ♃ ſouths between 11 and 12, and ſets near 4 in the morning, ♂ ſets about 10 at night, ☿ about the middle of the month riſes a little after 2 in the morning, ♀ is hid by the Sun beams, but ſhortly after becomes Oriental, and will then be a morning Star, and therefore he may be ſeen at the end of the month in the morning riſing before the Sun.

June. ♄ at the beginning hereof ſets near 1 in the morning, ♃ about the midſt hereof ſouths near 9 at night, and at that time ♂ ſets about 9 at night, and at the end is hid by the Sun-beams, ☿ then riſes about 1 in the morning, and towards the end may be ſeen near the Seven Stars, ♀ at the beginning will be near *Aldebaran*, and at the end of the month riſes before the Sun.

July. ♄ about the midſt hereof riſes at 10, and ♃ at 11 at night, ♂ is oriental and becomes a morning Star, and yet very rarely ſeen this month, ☿ at the beginning may be ſeen with *Aldebaran*, and towards the end riſes early in the morning. ♀ about the midſt is occidental and an evening Star, and may be ſeen about the end of the month.

Auguſt. About the midſt of this month ♄ ſets at 8 at night, and ♃ about an hour after, ♂ riſes before the Sun, and cannot be ſeen, but at the end of the month emerges out of the Sun beams in the morning; Then ☿ riſes about 2 in the morning, and ♀ ſets about 7 at night.

September. ♄ ſets at the beginning hereof near 7 at night and afterwards hid by the Sun-beams. And ♃ towards the end ſets much about the ſame time, ♂ is near the Sun and cannot be ſeen, ☿ is with the *Lions heart* the 10 day, and

towards the end of the month riſes near 4 in the morning, ☿ is oriental and our morning Star, but not to be ſeen this month.

October. About the midſt hereof ♄ and ♀ may be ſeen near together, ♄ riſes between 3 and 4 in the morning and ♀ towards the end between 5 and 6 in the morning. About the 10 day ♃ may be ſeen in the evening Southwelt, he ſets about 6 at night, ♂ at the end riſes a little after 4 in the morning: and at the beginning may be ſeen with ♀, but ☿ cannot be ſeen this month.

November. About the midſt hereof ♄ riſes a little after 3 in the morning; ♃ becomes Oriental and riſes before the Sun, and is therefore a morning Star, but is very rarely ſeen this month. ♂ riſes about 4 in the morning, and ♀ near 7 in the morning, ☿ is occidental and an evening Star, but not eaſily ſeen this month.

December. The Planet ♄ about the midſt hereof will be ſouth between 6 and 7 in the morning, and ♃ riſes then much about the ſame time. Towards the end of the month ♂ riſes between 3 and 4 in the morning; and about the middle thereof ☿ may be ſeen ſetting after the Sun.

☞ Note that the Sun enters *Aquarius* January 9, *Piſces* February 8, *Aries* March 10, *Taurus* April 10, *Gemini* May 11, *Cancer* June 11, *Leo* July 13, *Virgo* Auguſt 12, *Libra* September 13, *Scorpio* October 13, *Sagittarius* November 12, and *Capricorn* December 11. and moves about a degree in a day natural or 24 hours, by which his place any day in the Year may be nearly eſtimated for ordinary uſe.

Excellent Notes of Husbandry and Gardening for each Month in the Year.

January.

IN this Month cut down Timber and it ſhall not cleave nor be eaten with Worms: in the laſt quarter of the Moon ſet or ſow Kernels and Bay-trees, Primet and Box; ſet Quick-ſets, Roſe-trees, Peaches, Philberts & Plumb-trees, if the froſts be not too hard, prune and lop them: before full Moon ſow and ſet Beans and Peaſe, and dung Land: in the laſt quarter geld Cattle to rear, fallow Land for Wheat and Rye, trench Gardens with dung, and remove Bees: and for your own health keep your body warm, let good and wholſom Diet be your Phyſician, moderate exerciſe and labor your ſawce to cauſe Appetite.

February.

Sow all ſorts of Peaſe, and other Pulſe; ſow Muſtard ſeed, caſt up Dikes, ſet & plant Vines, Hops, Goosberries, and any Fruit that grows upon Bulhes; prune and trim all ſorts of Fruit-trees from Moſs, Canker, and all ſuperfluous branches, graff in the latter end of the Month, ſow Onions in cold ſtiff Land, take heed of cold, forbear Phlegmatick meats.

March.

In the new of the Moon (the wind any way but South or Weſt) graff Pears, Wardens or Apple-trees, make an end of ſowing all manner of Pulſe, and begin to ſow Oates, Barly, Parſnips, Onions, Carrots, Cucumbers, Melons, and all kind of Pot-herbs, ſlip Artichoaks and Sage, geld Lambs, let Bloud according to ſtrength and neceſſity, the Sign and weather being alſo fit (but repair to the Learned Phyſician) look what cannot be cured in the Spring by Phyſick, will hardly be cured all the Year after.

April.

Sow Barly, Hemp and Flax, Pole Hops, ſet and ſow all kind of Garden Herbs, open Hives, and let Bees labour for their living, let Tanners now provide them with Bark, and all good Houſwives look to their Daries, bleed and purge with advice: thoſe that are troubled with Aches or the Gout, let them go to the Bath in this or the three following Months.

May.

Sow Barly on all light Lands and bearing Grounds, and Hemp and Flax, and all manner of fine Seeds and Herbs, take Lambs from their Dambs, ſtir Land for Wheat and Rye, leave lopping of Trees, teach Hops to climb, but cut off the ſuperfluous Branches: riſe early, walk the Fields, eſpecially by running Streams: Sage and ſweet Butter is now an excellent Break-faſt; Sage and clarified Whey, as alſo Scurvy Graſs Ale, and Wormwood Beer, are wholſom Drinks to be drunk faſting.

June.

Sheer Sheep, bring home Fewel, weed Corn and Gardens, ſet Roſemary, Carnations and Gilly-flowers; ſow Lettice and Radiſh-ſeed three or four days after the Full, for then they will not run to ſeed, make Hay, carry Sand, Lime, Marle and manure of what kind ſoever, refitting your Land, cut neither Hedge nor Tree in this and the two

next
